

Klosterhede

Inward opening window

Klosterhede

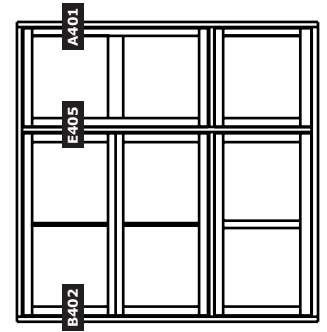

A system with inward opening sashes and modern, strong profiles. A system with a wide range of applications. The construction is solid and strong, and the Klosterhede system is durable, requiring a minimum of maintenance. This system is excellent for e.g. institutions, schools and other buildings in which the units are often operated.

Combination units

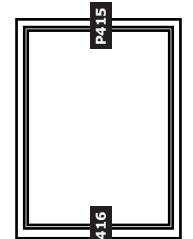

Klosterhede is possible for modern architecture and with constructions with large glass sections and at the same time fulfilling all modern demands for insulation, break-in prevention, hardware technology, sound insulation etc.

Hardware

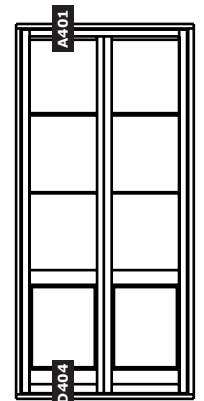

Klosterhede may be ordered as sidehung, tilt and turn or tilt window with multi point anodised safety hardware from Maka. All hinges are 3D adjustable which ensures optimal adjustment of all window sashes. Window handles are optional extras - please see in WDS.
